

Functional & Performance Testing Template

Model Performance Test

Date	30 September 2026
Team ID	SWTID-2026-8273
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	UI Policy - Short description mandatory (State = New)	1. Open Incident > New. 2. Keep State as New and leave Short description blank. 3. Click Submit.	Short description is mandatory; error message shown and incident is not saved	Short description marked mandatory; form blocked with error message	Pass
FT-02	UI Policy - Resolution code and Resolution notes mandatory (State = Resolved)	1. Open an existing incident. 2. Set State to Resolved; leave both fields empty. 3. Click Update.	Both fields become mandatory; update is blocked until they are filled	Both fields mandatory; update blocked until filled	Pass
FT-03	UI Policy - Assigned to read-only until Assignment group is selected	1. Open Incident > New. 2. Try to edit Assigned to. 3. Select an Assignment group and try again.	Assigned to is read-only while Assignment group is empty; editable after selection	Read-only before selection; editable after selecting Assignment group	Pass
FT-04	UI Policy - 'Reverse if false' behavior	1. Set State to Resolved (fields mandatory). 2. Change State back to In Progress.	Resolution fields return to optional	Fields returned to optional after 'Reverse if false' was enabled (BG-003 fixed)	Pass
FT-05	Client Script - onLoad	1. Open Incident > New. 2. Open an existing incident.	Info message and default values appear only on a new incident form	Message and defaults shown on new form only (BG-002 fixed)	Pass
FT-06	Client Script - onChange (Category)	1. Select Category and Subcategory. 2. Change the Category.	Subcategory is cleared and an information message is shown	Subcategory cleared; message displayed	Pass
FT-07	Client Script - onChange (Priority)	1. Set Impact and Urgency to High so Priority becomes 1 - Critical.	Warning message is displayed for Critical priority	Warning displayed correctly (message text corrected, BG-004)	Pass
FT-08	Client Script - onSubmit (Short description validation)	1. Enter a Short description of fewer than 10 characters (or only spaces) and Submit. 2. Enter a valid description and Submit.	Invalid input: error shown and submission stopped. Valid input: incident saved	Invalid input blocked with error message (BG-001 fixed); valid input saved	Pass
FT-09	Update Set capture	1. Open Update Set Incident_ClientScript_UIPolicy. 2. Review Customer Updates.	All UI Policies and Client Scripts are captured in the Update Set	All UI Policies and Client Scripts captured	Pass
PT-01	Incident Form Load Time	Open a new Incident form with all UI Policies and Client Scripts active and time the load using a timer.	Should be under 3 seconds	Form loaded in about 2 seconds	Pass
PT-02	Client Script Response Time	Change Category and Priority and time how fast the message appears.	Message should appear within 1 second	Messages appeared instantly (under 1 second)	Pass

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
PT-03	Multi-user Submission Test	Five team members submit incidents at the same time.	Should not slow down or show errors; all incidents saved	All 5 incidents saved without errors or delay	Pass
PT-04	Incident List Load Test	Open the Incident list with 100+ records and apply filters (State, Priority).	Should load under 3 seconds	List loaded in about 2.5 seconds	Pass

Summary: 13 test cases executed (9 functional, 4 performance). 13 Passed, 0 Failed. Performance values are approximate timings recorded during testing.
