Define the Problem Statements

Date	30 September 2026
Team ID	SWUID2026286057
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement:

The problem statements below describe the ServiceNow Incident form from the point of view of the people who use it and depend on its data.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Service Desk Agent who logs and resolves incidents every day	Record and resolve incidents quickly, with all the details needed	The form lets me save incomplete records (e.g., Resolved with no close notes) and shows fields that do not apply	Mandatory fields, auto-filled values and field visibility are not controlled by any Client Script or UI Policy	Frustrated and overloaded, because I make avoidable mistakes and waste time on rework
PS-2	An IT Service Manager responsible for incident quality and SLAs	Get complete, consistent incident data for reports, SLAs and audits	Many incidents are missing key details, or have inconsistent values entered by hand	Agents get no real-time guidance on the form, so data quality depends on individual habits	Concerned and uncertain, because I cannot trust the reports or improve service confidently
